Languages

Bilingual: English and Spanish (Native Spanish Speaker)

Soft Skills

Proactive · Selflearner · Creative · Detail oriented · Persistence · Adaptability · Leader · Animation · Prototype · Organization · Empathy · Efficient · I/A · Design Sprints · Pagination

Hard Skills

- Design Sprint Course — Platzi — Certificate
- Prototyping Design — Platzi — Certificate
- Information Architecture — Platzi — Certificate

MongoDB · Node · Git · NextJs · NestJS · React · Express · PostgreSQL · UI / UX · TypeScript · Material UI · Figma · Astro · Docker · Tailwind

Education

Masters in software Engineering , UNIR 02/2025 - Present

- Covering Agile Methodologies, Software Quality, Software Project Management,Cybersecurity, Secure Software Development,Cloud Computing, DevOps,Software Development Platforms and Architecture

Full Stack Development, CoderHouse 12/2022 - 01 /2024

- Completed a comprehensive program that covered the fundamentals and best practices of web development, JavaScript, React, and backend programming with node.

Web Development Full Stack JavaScript, Bedu 02 - 12/2022

- Out of more than 2000 participants in the program, only 50 achieved certification and I ranked 12th among them
- Learned and applied various technologies and tools, such as Docker, JS, Express, Bootstrap, React, MySQL, MariaDB, Node.js, and Git

UI/UX BootCamp, Bedu 01 - 08/2020

- Completed a comprehensive program that covered the fundamentals and best practices of UI/UX design, prototyping, and testing.
- Developed and presented a functional prototype of a web application that addressed a real problem of a user group, using atomic design, and Figma.

Degree in film and animation, Uniat 2012-2016

- Learned the fundamentals of animation, cinematography, and storytelling

Experience

Software Developer

Punto Chg · 09/2024 – Present

- Refactored and restyled modules based on my Redesign in figma in a legacy GRP built in WLanguage, providing an increase User clarity and Software response time.
- Led Docker deployments on hostinger vps and automations, reducing downtime and improving developer experience.
- Collaborated with team to define sprint deliverables, working with agile workflows.
- Developed a Windows-based application that automated the creation of 4.5M+ government-regulated accounts, reducing a month-long manual workflow to an 8-hour validated process. Led the full front-end, UX, and data-handling implementation, including database design, UI flows, JSON payload generation, and integration with the backend DLL responsible for final account creation.

Web Developer / Motion Designer

FoodLovers · 11/2019 – 09/2024

- Launched a full-featured e-commerce rental service using React and Firebase, generating consistent monthly traffic via SEO-optimized UI.
- Designed and delivered a storytelling-driven journalist portfolio, deplyed on vercel with cms connection, improving client engagement by over 60% using Nextjs.

Projects

DM Journel Designer and Dev 02/abril-current

- Currently working on a real time session manager and journel station for DM's for session based gameplay in NextJs with Tailwind and working on a strong api for the backend

PixelLend Back-end Developer 11/2023 - 01-2024

- Developed a mockup backend-centric e-commerce application allowing users to purchase products, manage carts, and view purchase history.
- Integrated Stripe payment manager for secure transactions.
- Utilized Express.js to create a RESTful API.
- Designed Handlebars views styled with Tailwind CSS for improved user experience.
- Implemented real-time chat functionality using WebSockets and MongoDB.
- Contributed to creating a robust and scalable application architecture.
